EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows: This application is in condition for allowance except for the presence of claims 25-31 to an invention non-elected without traverse. Accordingly, claims 25-31 have been cancelled.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach rotating a polishing pad and carrier head at different rates and acquiring a sequence of data traces using a sensor mounted in the platen, to attain a plurality of sensed paths corresponding to a predetermined number of scans that are substantially evenly radially distributed across the workpiece. The closest art, to Wiswesser et al, US006280289B1, teaches acquiring a sequence of data scans, but the pad and carrier rotate at the same rate, producing a sequence of scans across the same area of the workpiece. '289 bases their invention on calculations based on platen rotational speed and the linear sweep speed of the carrier across the platen, and not on the relative rotational speeds of the platen and carrier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
